

vClassroom Browser Settings

The recommended browser to access vClassroom is Internet Explorer. Prior to beginning a class, the browser should be configured to support both the ActiveX and Java connection options. Install the latest version of Java on all student PCs. You can download it at <http://www.java.com>

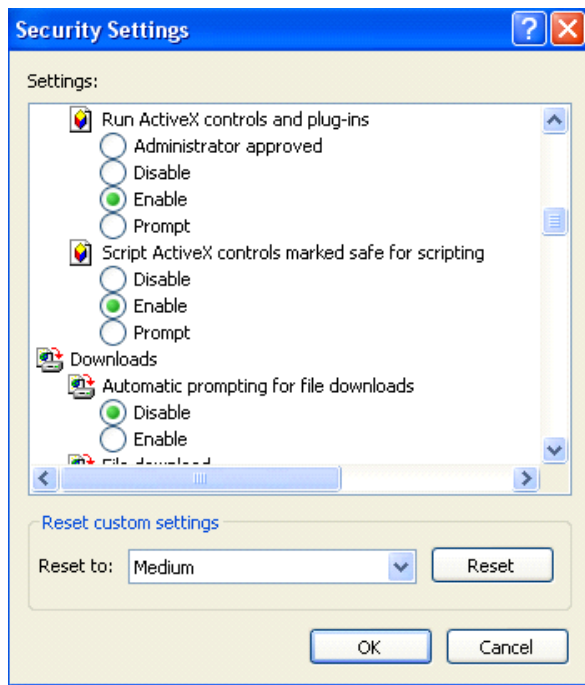

- 1) Click on **Tools**, then **Internet Options**.

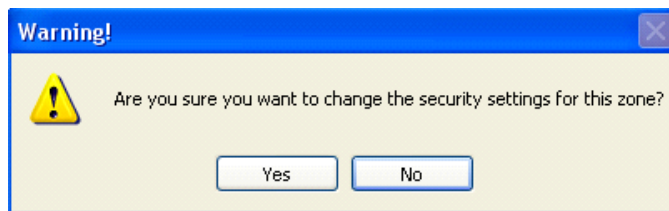

- 2) Choose the **Security** tab, click on the **Internet** icon, and then select **Custom Level**.

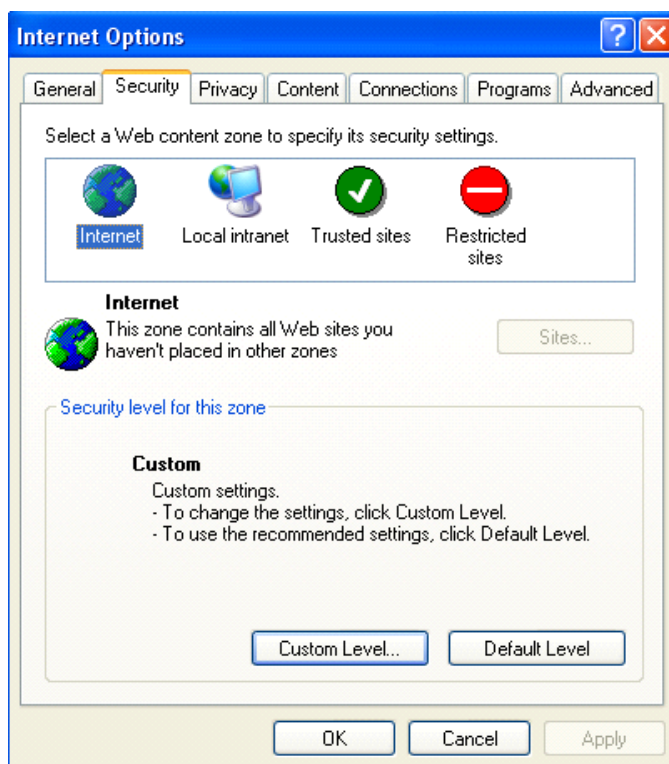

- 3) Under **Run ActiveX controls and plug-ins** select **Enable**.

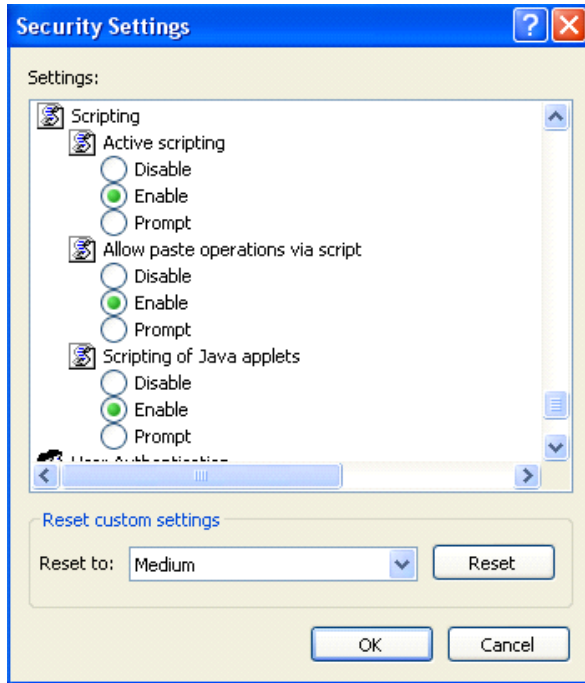

- 4) Click **OK**
- 5) At the warning, **Are you sure you want to change the security settings at this zone?** click **Yes**

- 6) You should be taken back to the **Security** tab of **Internet Options**.

- 7) Click on **Custom Level** and scroll down to the bottom.

- 8) Under **Scripting of Java applets** select **Enable**.
9) Click **OK**.
10) Click **OK** again to exit.
